## St Lucia Labour Force Survey (SLU-LFS)

Overview	
Type	Labor Force Survey [hh/lfs]
Identification	DDI-LCA-CSO-LFS-2012-V01
Version	<p>Production Date: 2012-05-04</p> <p>- vQ1_2012: Basic raw data, obtained from data scanning and verification (before automated editing).</p> <p>- vQ1_2012M: Edited data with derived variables and weights, second version, for internal use only.</p> <p>File labeling: LFSPQ1_2012 is the person file for the labour force survey for the 1st quarter of 2012 LFSHQ1_2012 is the housing file for the labour force survey for the 1st quarter of 2012</p> <p><u>Notes</u></p> <p>The core elements of the St Lucia Labour Force survey (LFS) has not changed very much from the 2nd Quarter of 2008. From the 2nd quarter of 2008 the reference periods within the LFS survey was updated from a 2-month reference period for seeking work to a four week period and from a three week period for availability to work to a one week reference period for availability to work. In addition, the question on availability for additional work was updated to ensure the accurate measurement of under-employment. These changes have brought the St Lucia LFS in line with regional and international standards.</p> <p>In the last three quarters of 2008 a module was added to the LFS questionnaire to collect data on the informal sector. This module was added to the employment section of the LFS questionnaire and included Question 27A to Question 27L. The inclusion of this section of the questionnaire allowed for the measurement of the formal and informal sector and the identification of formal and informal businesses based on the following criteria:</p> <p>The 1-2 Survey (1-represents the Labour Force Survey and 2-represents an establishment survey to obtain detailed establishment level data from persons identified in the LFS as self-employed with employees or self employed without employees) was helpful in setting the broad framework within which all enterprises and employees in St Lucia could be located. To classify an enterprise identified using this means as informal as opposed to formal, the following criteria was applied:</p> <p>Criterion 1: The individual has to be an active worker (or owner of a business) aged 15 years old or above.</p> <p>Cr. 2: This worker has to be the head of a business (self-employed as own-account worker or employer).</p> <p>Cr 3: The business does not keep formal accounts.( No Profit and Loss Account or balance Sheet)</p> <p>Cr. 4: The type of ownership is a household/individual unincorporated enterprise.</p> <p>Cr. 5: At least a part of the production is sold.</p> <p>1-2 Survey which was done in combination with an investment climate survey helped to assist policy makers identify areas to assist with the development of small businesses</p> <p>To incorporate the HUEM (Household Unincorporated Enterprises with Market Output). First the size of the sample desired was determined based on:</p> <p>The key statistic/indicator to be generated by the labour force, the unemployment rate, on the informal Sector Survey side, key indicators, related to the numbers of persons whose status is</p> <ol style="list-style-type: none"> <li>5. Self-employed with employee</li> <li>6. Self-employed without employee</li> </ol>

	Total of 450 cases were expected, 350 were obtained. The sample was selected in such a way that it was large enough to reliably estimate some of the indicators stemming from the smallest sub-populations. In this case, it was numbers of self employed persons or the “unemployment rate”.
<b>Series</b>	<p>The St Lucia Labour Force Survey, 2012 Round 1 (LFS1) is the first round of the quaterly continuous labour force survey for 2012. The St Lucia Labour Force Survey was first conducted in 1992 when the first survey was completed with the assistance of the ILO regional office in Port of Spain Trinidad and Tobago. The ILO labour specialist who guided the process was Ms Grace Strachan. From 1994 to 2000 it has been a continous survey done during the first six and the last six months of each year, respectively. From the third quarter of 2002 to the first quarter of 2010 the survey was done continuously during the four quarters of each year with a rolling one week reference period.</p> <p>For the periods from the 2nd quarter of 2010 to the 2nd quarter of 2011 a labour force survey was not done, this was replaced by a labour module within the 2010 Census. From the 3rd quarter of 2011 to the present the continuous quarterly labour force survey has continued and is expected to continue into the foreseeable future. The survey is coordinated by the Director of Statistics, Mr Edwin St Catherine who is the sampling and data processing specialist for the survey. He is assisted by Ms Jacinta Francis who is responsible for the maintenance, publication and dissemination of results. The two main supervisors for the survey are Ms Martha Joseph and Ms Urmain Gray. The regional ILO Office in Port of Spain continues to support the development and mordernisation of the survey through the support of Dr Reynold Simmons.</p>
<p><b><u>Abstract</u></b></p> <p>The Labour Force Survey aims to collect information on the supply side of the labour market. It provides information on the extent of available and unused labour time and on relationships between employment and income. Thus, the data collected can be used for:</p> <p>Macro-economic monitoring:- from an economic point of view, a main objective of collecting data on the economically active population is to provide basic information on the size and structure of a country's workforce. The unemployment rate in particular is widely used as an overall indicator of the current performance of a country's economy.</p> <p>Human resources development: The economy is changing all the time. In order to meet the needs of the changing economy, people need to be trained. These areas of training must therefore be identified.</p> <p>Employment policies: For an economy to work at its maximum potential, all persons wanting to have work should have jobs. Some persons may wish to have full-time jobs, and can only find part-time work. We need to know what proportion of the labour force these people represent in order to assess the social effects of government employment policies.</p> <p>Income Support and social programmes: For the majority of people, employment income is their main means of support. People need not only jobs, but more importantly, productive jobs in order to receive reasonable incomes. We need to know what levels of income are being earned by different groups of persons.</p>	
<b>Kind of Data</b>	Sample survey data [ssd]
<b>Unit of Analysis</b>	households and individuals

## Scope & Coverage

### Scope

The scope of the Labour Force Survey includes:

- HOUSEHOLD: Household characteristics, quality of dwelling unit, available facilities, amount of rent paid and use of information communication technologies
- PERSONS: Demographic informaiton on all persons within the household, education and training recieved, current and usual activity status of persons, employment conditions such as hours worked, whether seeking additional work, indicators of quality of work performed by household members over the age of 14 years, the unemployed and conditions

of unemployment, e.g. duration of unemployment, methods of upkeep by the unemployed. The economically inactive, intentions to join the labour force.

<b>Topics</b>	Labor Markets
<b>Time Period(s)</b>	2012
<b>Countries</b>	Saint Lucia
<b>Geographic Coverage</b> National Coverage	
<b>Universe</b> The survey covered all de jure non-institutional household members (usual residents), it focuses on the employment, unemployment and current activity or inactivity status of all persons aged 15 years and over resident in the household

<b>Sampling</b>
<p><b>Sampling Procedure</b></p> <p>Every quarter (three months) approximately 1,000 households are interviewed, there is a one third overlap between the households interviewed between each round of the survey.</p> <p>The Multi-Stage sampling procedure developed for the St. Lucia MS (Master Sample) Frame is used for the execution of the labour force survey:</p> <p>The two stage process of sample selection in the ST. LUCIA MS entails the selection of the PSUs within the districts. This is followed by the systematic selection of the cluster of households or USU (Ultimate Sampling Units) within the selected PSUs. The two stages in the design is elaborated as follows:</p> <p>a. In the first stage, a sampling frame is constructed consisting of all of the enumeration districts from the census of 2001. The size of each enumeration district is measured in units of clusters of households. In the case of the ST. LUCIA MS, approximately seven or eight households were allocated per cluster. The clusters which are allocated to the EDs all have an equal probability of selection within the specified geographic domain in which they are allocated. In addition, the number of clusters allocated to an ED is a measure of the size of the ED. Clusters, therefore ensure the selection of EDs or Primary Sampling Units with probability proportional to the size of the ED. The ST. LUCIA MS frame consists of nine sub-samples / replicates, with each replicate selected with a probability of <math>(1 / (16 * 9))</math> or <math>1 / 144</math>.</p> <p>b. In the second stage a non-compact cluster of households is selected within the selected PSU using systematic random sampling. There are three elements to the selection of this non-compact cluster. Firstly, there is the sample interval, which is a measure of the size of the ED in terms of the total number of households it contains. The larger the ED or PSU the larger will be the sample interval assigned and consequently the larger will be the number of clusters assigned to the ED. This approach ensures that the total number of households selected in any selected ED is approximately the same. In the case of the "Castries" in the ST. LUCIA MS frame the approximate number is five (5). Secondly, the random start is determined by use of a random number generator. With a Microsoft EXCEL spreadsheet the formulae takes the following form, =ROUND(RAND()*E1,0)+1, where E1 is the cell containing the sample interval (or total number of clusters assigned)</p>

RAND() is the function which generates the random number. The round() function is used to round the result to the nearest whole number. The third element of choosing the non compact cluster is a combination of the above. A random number (r) is chosen between 1 and the sample interval value, I, inclusive, then to this number is added the sample interval for the full list of households within the primary sample unit. Thus, the list of selected households would be r, r + I, r + 2I, r + 3I, r + 4I, ....., r + (n - 1)I, where n is the cluster size assigned to the district, in the case of Castries n is five.

#### A. Size of the Sample

As has been explained before the decision to use a sampling fraction of 1 : 16 and to assign nine replicates to each District (the geographic domain) was based on the need to take advantage of the small size of the countries covered by this MECOVI project. This was done by increasing the "spread" of the sample across EDs and as a result improving the precision of the estimates which can be obtained from it. In addition, attention was paid to ensuring that were the CSO of ST. LUCIA to consider developing further its Integrated Household Survey Programme, the ground work would have been laid through this Master Sample Frame design for periodic, ad hoc or continuous sample surveys. The achievement of this objective has already been demonstrated through the use of this Sample Frame in the conduct of St. Lucia's continuous Labour Force Survey.

Therefore for any one sub-sample given that there are nine, the sampling fraction is 1 / 16 by 1 / 9 or 1 / 144. If a periodic, ad hoc or quarterly survey included the use of three replicates then the sampling fraction for these three replicates would be 3 / 144 or 1 / 16 by 3 / 9. In both cases the resultant sampling fraction is the product of the sampling probability for the Master Sampling frame and the probability of selection of a specific number of replicates.

#### B. Master Sample Domains of Study and Stratification

##### 1. Domains of Study:

The Master Sample frame was subdivided into eleven areas for the purpose of the provision of estimates from samples selected from this frame. The following list of the ten domains or sub-populations is based on the Districts which formed the basis for the collection of information on the population in the 2001 Census.

TABLE 1 : Domains of Study and Stratification criteria

##### DOMAIN OF STUDY No of PSUs METHOD OF STRATIFICATION

Castries Urban 42 Managers, Professional, technical and related Administrative

Castries Rural 112 Managers, Professional, technical and related Administrative

Anse-La-Raye/Canaries 24 Workers in Agriculture

Soufriere 22 Workers in Agriculture

Choiseul 20 Workers in Agriculture

Laborie 18 Workers in Agriculture

Vieux-Fort 37 Managers, Professional, technical and related Administrative

Micoud 42 Workers in Agriculture

Dennery 29 Workers in Agriculture

Gros-Islet 55 Managers, Professional, technical and related Administrative

The total number of PSUs in the ST. LUCIA MS is 401, a breakdown of the number of PSUs by District is shown in the table above. The average size of the PSUs was 118 approximately with a standard deviation of approximately 47. This configuration does not in the near term present a major problem for sample implementation, since the EDs/PSUs size does not exceed 100 by too great an extent, in addition, while consideration must be given to splitting EDs which have grown in size to over 200, there are not as exist in the case of St. Vincent and the Grenadines a significant number of excessively large EDs. Continuous maintenance of this situation is required and can be done by splitting all EDs over 200 in size into smaller ones of approximate size 100. The main objective of controlling the size of the PSUs, is to reduce variability and thereby improve the precision of estimates from the sample. The more equal the sizes of the PSUs the more likely the variance of characteristics between PSUs will be minimized and inversely the precision of the samples derived from the estimates from the Master Sample Frame increased.

##### 2. Stratification

As shown in the table above each of the domains of study was stratified according to specific criteria. In the more urban domains the criteria used was the percentage of Managers, professional, sub-professionals in the population. The PSUs or EDs were therefore arranged in descending order of the proportion of this group in the population of the ED. In the rural domains the PSUs were arranged in descending order of the proportion of agriculture workers in the population of the ED. In the case of Canaries and Anse-la-Ray, the sizes of the populations in these domains mandated a joining of the two to allow for the creation of a large enough domain for reporting purposes.

### **Response Rate**

On average the response rate on the Saint Lucia Labour force survey is over 85%.

### **Weighting**

Sample weights were calculated for each of the data files. Sample weights for the household data were computed as the inverse of the probability of selection of the household, computed at the sampling domain level (Districts). The household weights were adjusted for non-response at the domain level, and were then normalized by a constant factor so that the total weighted number of households equals the total unweighted number of households. The household weight variable is called WU and is used with the HH data and the Person weight variable is called WT and is used with the persons dataset.

## **Data Collection**

<b>Data Collection Dates</b>	Round 1 - 2012: start 2012-01-01
	Round 1 - 2012: end 2012-03-31
	Round 2 - 2012: start 2012-04-01
	Round 2 - 2012: end 2012-06-30
	Round 3 - 2012: start 2012-07-01
	Round 3 - 2012: end 2012-09-30

<b>Data Collection Mode</b>	Face-to-face [f2f]
-----------------------------	--------------------

### **Data Collection Notes**

During the quarterly conduct of the labour force survey, sixty nine enumeration districts are visited each month. Approximately 15 interviewers are employed to conduct the survey. Within the Statistical Office two supervisors are responsible for allocating each interviewer to an enumeration district for the conduct of follow-up field visits and telephone calls to households if clarification on responses obtained by enumerators is required. Each interviewer is allocated between 5 to 7 interviews to conduct within the enumeration district based on a specific sample interval. The interview is given an envelope with 7 to 10 questionnaires, a visitation record from the 2010 Census of population and housing or a subsequently updated listing of households and an enumeration district map.

### **SAINT LUCIA FIELD PROCEDURES**

1. The Officer Supervisor (who in this case is also the field supervisor) receives the attached list of EDs for the month from me, in this case it is the month of March 2013. The list has the following headings:

DISTRICT	SUBSAMPLE	EDNumber	H/HLDS	INTERVAL
START	1	2	3	4

DISTRICT - District of Residence

SUBSAMPLE - SubSample Number

EDNumber - Enumeration District Number

H/HLDS - Number of household in the Enumeration District

INTERVAL - Sample Interval (if household number 3, 11, 19, 27 are selected the interval is 8)

START-This is a random start equal to or less than the sample interval, in our example this is 3

1 (The column heading 1, indicates that this is the first household

to be interviewed, it is the same as the random start household, in our example this is household 3)

2 (The column heading 2, indicates that this is the second household to be interviewed, it is the same as the random start household plus the sample interval, in our example this is household 11)

3 (The column heading 3, indicates that this is the third household to be interviewed, it is the same as the second household number plus the sample interval, in our example this is household 19) etc

The office supervisor then writes in the DISTRICT No, SUBSAMPLE No, EDNumber and the selected household number on the front cover of each of the 7 households questionnaires selected to be interviewed for the Enumeration District (represented by the enumeration district number or EDNumber). This is so because the total number of households in the ED is 55 and the last household to be interviewed will be household number 51. The seven blank questionnaires with this information written on the front cover of each is placed in an envelop with the ED Number written on the envelop. A few additional blank questionnaires are also placed in the envelop in case a question is damaged and has to be re-written.

The office supervisor then places two additional items in the envelop for the enumerator:

1) The Visitation Record: In the example I am using the ED Number is 01903. I have attached an actual visitation record so you can see exactly how our addresses are written on an actual visitation record which is the main document we use to locate the selected household. Using the visitation record the enumerator will be required to visit households numbers, note on the visitation record the column is headed "Household Number"

For household numbers 003, 011, 019, 027 in the visitation record the enumerator will find the address of household number as (see actual visitation record attached 01903VisitationRecord)

a) 003 Across the Bridge - Buhdoo Catherine (name of head of household) located at Trou, Rouge

b) 011 Dorville, Ann - (name of head of household) located at Trou, Rouge

c) 019 Everlyn, Beverly - (name of head of household) located at Trou, Rouge

The building number is used in some cases to identify the household number to interview where there are building numbers on the Map corresponding to building numbers on the visitation record. If these corresponding numbers were not written on the map the enumerator starts at the start point on the map (see 00200 attached) and follows the sequence of household numbers until he locates the

2) An ED Map: I have attached the map for ED 01903 here as an example, in many cases these maps are numbered with building numbers which assist in the location of the correct household number as shown in the case of ED 00200 which is attached. The visitation record can be matched to the map and they are in sequence.

The enumerator having received an ED Map, a visitation record and seven questionnaire with the EDNumber and household number written on each questionnaire has all needed to locate the household and conduct the interview. The enumerator then writes in the address on the questionnaire, this address can easily be verified by the Office/Field Supervisor as shown above.

Upon completion of the interview the enumerator returns to the office with the completed questionnaires. The supervisor checks that all questionnaire contain a phone number on the front cover and any details of missing information with the enumerator. The enumerator leaves the office and the supervisor randomly calls households to verify the responses provided on the questionnaire. If the information cannot be validated over the phone the Supervisor makes a personal visit to the respondent to verify the content of the interview. After this random check the envelope of seven completed questionnaires is accepted and sent to the coder/editor for subsequent scanning.

## **Questionnaires**

The questionnaire is administered to all members of the household. Questions 1 through 6 are to be completed for all members of the household, these questions cover age, sex, relation to head of household, country of birth etc. All subsequent questions refer to persons 15 year of age and older. The questionnaire is divided into five parts

PART 1: For all members of the household (regardless of age) - Demographic and emigration questions

PART 2: To be completed for persons 15 years and older - Education, Training, activities during the reference week or month, working at a job, on vacation, methods of seeking work, availability for employment

PART 3: For persons employed during the reference week - Number of actual hours of work, number of usual hours of work, seeking additional work, status in employment, industry and occupation of employment

PART 3A: For persons holding more than one job during the reference week - Number of actual hours of work, number of usual hours of work, seeking additional work, status in employment, industry and occupation of employment

PART 4: For persons unemployed during the reference week - Length of unemployment, means of support, occupation in last job

PART 5: For persons not in the labour force during the reference week, first seekers, means of support, intention to join the labour force in the future.

The questionnaire used to conduct the labour force survey is provided as an external resource.

<b>Data Collector(s)</b>	Central Statistical Office (CSO) , Ministry of Finance, Economic Affairs and Social Security
--------------------------	--

### **Supervision**

The role of the supervisor is to coordinate field data collection activities, including management of the field teams, supplies and equipment, finances, maps and listings. Additionally, the field supervisor assigned the work to the interviewers, spot checked work, maintained field control documents, and sent completed questionnaires and progress reports to the central office.

The field editor is responsible for checking for missed questions, skip errors, fields incorrectly completed, and checking for inconsistencies in the data.

## **Data Processing & Appraisal**

### **Data Editing**

Data editing takes place at a number of stages throughout the processing, including:

- Office editing and coding when the questionnaires are delivered to the Statistics Office by the enumerators
- During data verification of the scanned questionnaire
- Structure checking and consistency editing and completeness is performed after data capture to MS SQL Server
- Secondary editing is completed in CSPRO where a software program for this purpose have been written
- Final production of SPSS data files after all editing is completed in CSPRO.

### **Other Processing**

Data are processed in clusters (or Enumeration District, usually consisting of 5 to 7 completed questionnaires), with each cluster being processed as a complete unit through each stage of data processing. Each cluster goes through the following steps:

- Questionnaire reception
- Office editing and coding
- Questionnaire Scanning and verification
- Structure and completeness checking and the export of the data to SQL Server for storage
- Back up of raw data takes place in SQL where files are converted to ASCII format for export to CSPRO using an SQL stored procedure

After all clusters are processed, all data is concatenated together and then the following steps are completed for all data files:

- Export to CSPRO for data editing, adding of sample weights and the creation of derived variables for analysis in SPSS
- Secondary editing
- Edited data back up
- Export to SPSS of two files, the household file and the person file
- Data quality tabulations
- Production of analysis tabulations

Details of each of these steps can be found in the data processing documentation, data editing guidelines, data processing programs in CSPro and SPSS, and tabulation guidelines.

For tabulation and analysis SPSS versions 20.0 and 19.0 were used.

### **Estimates of Sampling Error**

Estimates from a sample survey are affected by two types of errors: 1) non-sampling errors and 2) sampling errors. Non-sampling errors are the results of mistakes made in the implementation of data collection and data processing. Numerous efforts are made during implementation of the quarterly labour force survey to minimize this type of error, however, non-sampling errors are impossible to avoid and difficult to evaluate statistically.

If the sample of respondents had been a simple random sample, it would have been possible to use straightforward formulae for calculating sampling errors. However, the quarterly labour force sample survey is the result of a multi-stage stratified design, and consequently needs to use more complex formulae. The SPSS complex samples module is being used to calculate sampling errors for the quarterly labour force survey for St Lucia. This module uses the Taylor linearization method of variance estimation for survey estimates that are means or proportions. This method is documented in the SPSS file CSDescriptives.pdf found under the Help, Algorithms options in SPSS.

Sampling errors have been calculated for a select set of statistics (all of which are proportions due to the limitations of the Taylor linearization method) for the national sample. For each statistic for which sample errors are computed, the estimate, its standard error, the coefficient of variation (or relative error -- the ratio between the standard error and the estimate), the design effect, and the square root design effect (DEFT -- the ratio between the standard error using the given sample design and the standard error that would result if a simple random sample had been used), as well as the 95 percent confidence intervals (+/-2 standard errors).

Details of the sampling errors are presented in the sampling errors table presented in the external resources.

# Variables Description

Dataset contains 749 variable(s)

# File : LFSHQ1\_2012

## # REC\$TYPE

**Information** [Type= discrete] [Format=character] [Missing=\*]

**Statistics [NW/ W]** [Valid=849 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1		849	100.0%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

## # DISTRICT: District

**Information** [Type= discrete] [Format=numeric] [Range= 1-12] [Missing=\*]

**Statistics [NW/ W]** [Valid=849 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	CASTRIES CITY	54	6.4%
2	CASTRIES RURAL	85	10.0%
3	CASTRIES SUB-URBAN	147	17.3%
4		30	3.5%
5		19	2.2%
6	SOUFRIERE	40	4.7%
7	CHOISEUL	49	5.8%
8	LABORIE	35	4.1%
9	VIEUX-FORT	89	10.5%
10	MICOUD	108	12.7%
11	DENNERY	70	8.2%
12	GROS-ISLET	123	14.5%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

## # ED: ED

**Information** [Type= continuous] [Format=numeric] [Range= 701-15600] [Missing=\*]

**Statistics [NW/ W]** [Valid=849 /-] [Invalid=0 /-] [Mean=8615.923 /-] [StdDev=4541.372 /-]

## # HHNO: Household Number

**Information** [Type= continuous] [Format=numeric] [Range= 1-168] [Missing=\*]

**Statistics [NW/ W]** [Valid=849 /-] [Invalid=0 /-] [Mean=54.025 /-] [StdDev=36.675 /-]

## # FORM: Form

**Information** [Type= discrete] [Format=numeric] [Range= 0-2] [Missing=\*]

**Statistics [NW/ W]** [Valid=849 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1		843	99.3%
2		5	0.6%
3		1	0.1%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

## # BATCHTRACK: BatchTrack

**Information** [Type= discrete] [Format=character] [Missing=\*]

**Statistics [NW/ W]** [Valid=849 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
0000000000000000		1	0.1%

# PNO: Pno - Person Number

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Pre-question</b>	The name is recorded to distinguish persons entered on the form and enable you to identify the correct person if any information is missing.
<b>Literal question</b>	What are the names of all those who slept four or more nights and shared at least one daily meal in this dwelling during the week ending.../.../...?
<b>Post-question</b>	Names, or addresses will not be put on computer records and are NEVER used in any publication result.
<b>Interviewer's instructions</b>	Write the names of ALL household occupants who are in the survey as defined in section 2.4 on page 12.

Value	Label	Cases	Percentage
1		896	<div></div> 34.3%

# P2: P2 - Relationship to Head Of Household

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Pre-question</b>	The first person listed is ALWAYS the head of the household. The respondent was asked to identify the head of his/her household. The head is usually the primary financial provider and may not necessarily be the respondent.
<b>Literal question</b>	What is your relation to the head of the household?
<b>Post-question</b>	The first person is listed at '01', the answer will always be 1: head. Otherwise indicate the relation to the first person of all other persons listed. Step-children, children of one partner, adopted children are all to be considered children and categorized as child, if they are so related to the head of household. Other relative" would include any other relative who does not fit options 2,3 or 4.

### # P5: P5 - Migration

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 15-999] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-] [Mean=875.952 /-] [StdDev=105.6 /-]
<b>Pre-question</b>	If the respondent was born abroad in question 4, then we need to know whether he/she came to live in St. Lucia within the twelve months period preceding the reference week for the survey.
<b>Literal question</b>	How many months have you lived in St. Lucia before the week ending .../.../...?
<b>Interviewer's instructions</b>	If the reference week is July 5 - 9, 1993 and respondent answered May 1992, then you should enter 2 as the answer to the question, since it is BEFORE the twelve months period preceding the survey.

### # P6: P6 - Age Of Person

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-15] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Literal question</b>	What was your (...s) age at last birthday?
<b>Post-question</b>	The respondent's age at his last birthday was recorded.
<b>Interviewer's instructions</b>	If the respondent is 98 years or older, then you should enter 98 in the box.. If the respondent refuses to give his age then you should enter his response as 99. NOTE THAT IF THE RESPONDENT IS UNDER 15 YEARS, you should not continue the interview.

Value	Label	Cases	Percentage

### # P7: P7 - Educational Attainment

Information	[Type= discrete] [Format=numeric] [Range= 0-9] [Missing=*/8]
Statistics [NW/ W]	[Valid=2068 /-] [Invalid=542 /-]
Pre-question	A student over 15 years who has not completed primary school and a 65 year old man who dropped out of primary school when he was young are both to be recorded as "Incomplete Primary".
Literal question	What is the highest level of education have (...has) attained?
Post-question	Indicate the highest educational level the respondent has attained.
Interviewer's instructions	If "other" is ticked, be sure to write the level of education in the space provided. Tertiary refers to post secondary education.

Value	Label	Cases	Percentage
0	Not Stated	52	2.5%
1	None	98	4.7%
2	Complete Primary	864	41.8%
3	Incomplete Primary	129	6.2%
4	Complete Secondary	630	30.5%
5	Incomplete Secondary	124	6.0%
6	Tertiary	156	7.5%
7	University	15	0.7%
9	Not Stated	0	
8	Other	542	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P8: P8 - Educational Qualification

Information	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/88]
Statistics [NW/ W]	[Valid=2068 /-] [Invalid=542 /-]
Pre-question	Record the highest educational examination passed.
Literal question	What is the highest level/ type of examination that you have (...has) passed?
Post-question	If the respondent has acquired three CXC passes, grades III or higher, then the appropriate option to record is 4.
Interviewer's instructions	Remember if the response is "other" be sure to write in the level or type of examination in the space provided.

Value	Label	Cases	Percentage
1	None	541	26.2%
2	Common Entrance	214	10.3%
3	GCE/CXC 1-2	176	8.5%

### # P11C: P11 - Type Of Training Recieved

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Pre-question</b>	Coding will be done at the office.
<b>Literal question</b>	For what main occupation were you (was) trained?
<b>Post-question</b>	Be sure to be as specific as possible when describing the occupation. Titles such as 'manager', supervisor', 'clerk' etc are insufficient.
<b>Interviewer's instructions</b>	The space provided write the type of occupation which the person has received most training.If trained for more than one occupation, enter the one most training was received.

Value	Label	Cases	Percentage
0	No Occupational Training_Other	0	
1	Managers	42	1.6%
2	Professionals	123	4.7%
3	Technicians and Associate Professionals	69	2.6%
4	Clerical Support workers	61	2.3%
5	Service and sales workers	204	7.8%
6	Skilled agricultural, forestry and fishery workers	26	1.0%
7	Craft and related trades workers	150	5.7%
8	Plant and Machine Operators and Assemblers	32	1.2%
9	Elementary Occupations	74	2.8%
8888	Not Applicable	0	
9999	Not Stated	1829	70.1%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P121: P121 - No Of Weeks Working

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-] [Mean=21.997 /-] [StdDev=25.127 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be" working" by our definition.
<b>Literal question</b>	During the past 12 months, how many weeks were you (was...)?
<b>Post-question</b>	What activity the respondent was engaged in during the last 12 months. What information that would enable us to classify the working age population into three (3) groups by identifying the number of weeks spent.
<b>Interviewer's instructions</b>	You need to find out how many weeks the respondent "worked" to the extent that work is defined as any work at all even if he/she worked only one hour per week. Enter the number of weeks in the space provided at '1'. Secondly, determine the number of weeks for which the respondent did no work at all, but wanted work, and was in a position to accept work. Again, enter the number of weeks in the box labelled '2'. Finally, determine the number of weeks for which the respdnent did no work at all, did not want work or was not in a position to accept work. Enter the number of weeks in box '3'. Note well that if the number of weeks for part 3 of question 12 is greater than 26,than continue at question 13, otherwise skip to question 14. Also note that all three boxes must be filled in for each respondent. Enter '00' (to indicate zero) where applicable.

### # P122: P122 - No Of Weeks Unemployed

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-] [Mean=7.312 /-] [StdDev=17.379 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be" working" by our definition.

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P14: P14 - Economic Activity

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-2] [Missing=*/9]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you work for pay, profit or family gain, during the week ending.../.../...?
<b>Post-question</b>	The population which was active during the reference week.
<b>Interviewer's instructions</b>	Having obtained the answer which you think is appropriate in keeping with the concept of economic activity, you may now record the appropriate response. Note that if the response is 'Yes', you will skip to PART 3, which deals with persons who were employed during the reference week. If the response is 'No', then continue to question 15.

Value	Label	Cases	Percentage
0		521	20.0%
1	Yes	1107	42.4%
2	No	982	37.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P15: P15 - Temporary Absence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you (...) have a job or business from which you were (...was) absent during the week ending.../.../...?

## File : LFSPQ1\_2012M

### # P15: P15 - Temporary Absence

<b>Post-question</b>	The reason why the respondent did no work during the reference week.
<b>Interviewer's instructions</b>	Persons without work who had made arrangements to take up paid employment or to engage in some self-employment at a period subsequent to the reference period but had not yet started work are not to be considered as temporarily absent from work. These persons are to be considered unemployed since there is no guarantee what such a job will materialise.

Value	Label	Cases	Percentage
1	Yes	15	0.6%
2	No	903	34.6%
8		1628	62.4%
9	Not Stated	64	2.5%

### # P24: P24 - Reson for Difference In Hours Worked

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2610 /-] [Invalid=0 /-]
<b>Literal question</b>	What is the reason for the difference in hours worked?
<b>Post-question</b>	Find out why the respondent worked more or less hours during the reference week than he usually does.
<b>Interviewer's instructions</b>	Note, if actual number of hours worked is equal to the usual number worked, then enter '1' in the space provided. If the actual hours worked is less than usual hours worked then a reason is required from the respondent, and options 2 to 10 should apply. Remember to specify at option '10' if it is selected. Finally, if actual hours worked is greater than usual hours worked, then respondent must give a reason. Options '11' and '12' apply in this instance. Remember to specify at option '12' if it is selected. Note that if the number of actual hours worked is equal to or greater than 35 hours, skip to question 27. The next question alerts the interviewer by asking the question 'are actual hours worked greater than or equal to 35?' and directs the respondent to question 25 if his/her response is no, and to question 27 if his/her response is yes.

# PNO: Pno - Person Number

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-]
<b>Pre-question</b>	The name is recorded to distinguish persons entered on the form and enable you to identify the correct person if any information is missing.
<b>Literal question</b>	What are the names of all those who slept four or more nights and shared at least one daily meal in this dwelling during the week ending.../.../...?
<b>Post-question</b>	Names, or addresses will not be put on computer records and are NEVER used in any publication result.
<b>Interviewer's instructions</b>	Write the names of ALL household occupants who are in the survey as defined in section 2.4 on page 12.

Value	Label	Cases	Percentage
1		897	<div></div> 36.4%
2		599	<div></div> 24.3%
3		436	<div></div> 17.7%

# P2: P2 - Relationship to Head Of Household

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-]
<b>Pre-question</b>	The first person listed is ALWAYS the head of the household. The respondent was asked to identify the head of his/her household. The head is usually the primary financial provider and may not necessarily be the respondent.
<b>Literal question</b>	What is your relation to the head of the household?

**File : LFSPQ2\_2012**

# P2: P2 - Relationship to Head Of Household

<b>Post-question</b>	The first person is listed at '01', the answer will always be 1: head. Otherwise indicate the relation to the first person of all other persons listed. Step-children, children of one partner, adopted children are all to be considered children and categorized as child, if they are so related to the head of household. Other relative" would include any other relative who does not fit options 2,3 or 4.

### # P121: P121 - No Of Weeks Working

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-] [Mean=20.807 /-] [StdDev=24.841 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be "working" by our definition.
<b>Literal question</b>	During the past 12 months, how many weeks were you (was...)?
<b>Post-question</b>	What activity the respondent was engaged in during the last 12 months. What information that would enable us to classify the working age population into three (3) groups by identifying the number of weeks spent.
<b>Interviewer's instructions</b>	You need to find out how many weeks the respondent "worked" to the extent that work is defined as any work at all even if he/she worked only one hour per week. Enter the number of weeks in the space provided at '1'. Secondly, determine the number of weeks for which the respondent did no work at all, but wanted work, and was in a position to accept work. Again, enter the number of weeks in the box labelled '2'. Finally, determine the number of weeks for which the respondent did no work at all, did not want work or was not in a position to accept work. Enter the number of weeks in box '3'. Note well that if the number of weeks for part 3 of question 12 is greater than 26, than continue at question 13, otherwise skip to question 14. Also note that all three boxes must be filled in for each respondent. Enter '00' (to indicate zero) where applicable.

### # P122: P122 - No Of Weeks Unemployed

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-] [Mean=7.516 /-] [StdDev=17.5 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be "working" by our definition.

9	Not Stated	32	1.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P14: P14 - Economic Activity

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-2] [Missing=*/9]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you work for pay, profit or family gain, during the week ending.../.../...?
<b>Post-question</b>	The population which was active during the reference week.
<b>Interviewer's instructions</b>	Having obtained the answer which you think is appropriate in keeping with the concept of economic activity, you may now record the appropriate response. Note that if the response is 'Yes', you will skip to PART 3, which deals with persons who were employed during the reference week. If the response is 'No', then continue to question 15.

Value	Label	Cases	Percentage
0		498	20.2%
1	Yes	998	40.5%
2	No	971	39.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P15: P15 - Temporary Absence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you (...) have a job or business from which you were (...was) absent during the week ending.../.../...?
<b>Post-question</b>	The reason why the respondent did no work during the reference week.
<b>Interviewer's instructions</b>	Persons without work who had made arrangements to take up paid employment or to engage in some self-employment at a period subsequent to the reference period but had not yet started work are not to be considered as temporarily absent from work. These persons are to be considered unemployed since there is no guarantee what such a job will materialise.

Value	Label	Cases	Percentage

### # P24: P24 - Reson for Difference In Hours Worked

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2467 /-] [Invalid=0 /-]
<b>Literal question</b>	What is the reason for the difference in hours worked?
<b>Post-question</b>	Find out why the respondent worked more or less hours during the reference week than he usually does.
<b>Interviewer's instructions</b>	Note, if actual number of hours worked is equal to the usual number worked, then enter '1' in the space provided. If the actual hours worked is less than usual hours worked then a reason is required from the respondent, and options 2 to 10 should apply. Remember to specify at option '10' if it is selected. Finally, if actual hours worked is greater than usual hours worked, then respondent must give a reason. Options '11' and '12' apply in this instance. Remember to specify at option '12' if it is selected. Note that if the number of actual hours worked is equal to or greater than 35 hours, skip to question 27. The next question alerts the interviewer by asking the question 'are actual hours worked greater than or equal to 35?' and directs the respondent to question 25 if his/her response is no, and to question 27 if his/her response is yes.

# PNO: Pno - Person Number

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	The name is recorded to distinguish persons entered on the form and enable you to identify the correct person if any information is missing.

## File : LFSPQ3\_2012

### # PNO: Pno - Person Number

<b>Literal question</b>	What are the names of all those who slept four or more nights and shared at least one daily meal in this dwelling during the week ending.../.../...?
<b>Post-question</b>	Names, or addresses will not be put on computer records and are NEVER used in any publication result.
<b>Interviewer's instructions</b>	Write the names of ALL household occupants who are in the survey as defined in section 2.4 on page 12.

Value	Label	Cases	Percentage
1		740	35.4%
2		507	24.2%
3		360	17.2%
4		235	11.2%
5		126	6.0%
6		72	3.4%
7		34	1.6%
8		17	0.8%

### # P2: P2 - Relationship to Head Of Household

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	The first person listed is ALWAYS the head of the household. The respondent was asked to identify the head of his/her household. The head is usually the primary financial provider and may not necessarily be the respondent.
<b>Literal question</b>	What is your relation to the head of the household?
<b>Post-question</b>	The first person is listed at '01', the answer will always be 1: head. Otherwise indicate the relation to the first person of all other persons listed. Step-children, children of one partner, adopted children are all to be considered children and categorized as child, if they are so related to the head of household. Other relative" would include any other relative who does not fit options 2,3 or 4.

Value	Label	Cases	Percentage
1	Head	719	34.4%
2	Spouse	260	12.4%
3	Child	746	35.7%
4	Parent	17	0.8%
5	Other Relative	289	13.8%

### # P3: P3 - Sex Of Person

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-2] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	What is your (...s) sex?
<b>Interviewer's instructions</b>	Mark the appropriate box. Be sure to ask about all persons who are not visible to you while completing the form, since there are many names which can refer to either sex.

Value	Label	Cases	Percentage
0	Not Stated	0	
1	Male	1056	50.5%

## File : LFSPQ3\_2012

### # P3: P3 - Sex Of Person

Value	Label	Cases	Percentage
2	Female	1035	49.5%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P4: P4 - Place Of Birth

<b>Information</b>	[Type= discrete] [Format=character] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	What is your (...s) place of birth?
<b>Interviewer's instructions</b>	Mark the appropriate box. Note that all that is required is whether or not the respondent was born in St. Lucia or abroad.

Value	Label	Cases	Percentage
0000000000000000	Not Stated	6	0.3%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P5: P5 - Migration

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 15-999] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-] [Mean=864.569 /-] [StdDev=139.676 /-]
<b>Pre-question</b>	If the respondent was born abroad in question 4, then we need to know whether he/she came to live in St. Lucia within the twelve months period preceding the reference week for the survey.
<b>Literal question</b>	How many months have you lived in St. Lucia before the week ending .../.../...?
<b>Interviewer's instructions</b>	If the reference week is July 5 - 9, 1993 and respondent answered May 1992, then you should enter 2 as the answer to the question, since it is BEFORE the twelve months period preceding the survey.

## File : LFSPQ3\_2012

### # P6: P6 - Age Of Person

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-15] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	What was your (...s) age at last birthday?
<b>Post-question</b>	The respondent's age at his last birthday was recorded.
<b>Interviewer's instructions</b>	If the respondent is 98 years or older, then you should enter 98 in the box.. If the respondent refuses to give his age then you should enter his response as 99. NOTE THAT IF THE RESPONDENT IS UNDER 15 YEARS, you should not continue the interview.

Value	Label	Cases	Percentage
1	0-4 Years	141	6.7%
2	5-9 Years	144	6.9%

### # P9: P9 - Training Recieved

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	Have you (has...) recieved training for any occupation?
<b>Interviewer's instructions</b>	If a person has received any type of "formal" training for any job, you should mark "yes". If the answer is "no", then skip to question 12.

Value	Label	Cases	Percentage
0	Not Stated	0	
1	Yes	643	30.8%
2	No	978	46.8%
9		470	22.5%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P10: P10 - Method By Which Training was Recieved

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=639 /-] [Invalid=1452 /-]
<b>Pre-question</b>	If "yes" was the response to the previous question.
<b>Literal question</b>	How did you (...) acquire most of this training?
<b>Post-question</b>	Institutional training (part time or full time) refers to training outside the place of work by means of a "formal" process.

## File : LFSPQ3\_2012

### # P10: P10 - Method By Which Training was Recieved

<b>Interviewer's instructions</b>	Remember that Apprenticeship is a formal contractual arrangement whereas on-the-job training is acquired during the period of employment. If a person has received more than one type of training, indicate the method by which MOST of the training was acquired.
-----------------------------------	--

Value	Label	Cases	Percentage

### # P121: P121 - No Of Weeks Working

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-] [Mean=22.406 /-] [StdDev=25.056 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be" working" by our definition.

## File : LFSPQ3\_2012

### # P121: P121 - No Of Weeks Working

<b>Literal question</b>	During the past 12 months, how many weeks were you (was...)?
<b>Post-question</b>	What activity the respondent was engaged in during the last 12 months. What information that would enable us to classify the working age population into three (3) groups by identifying the number of weeks spent.
<b>Interviewer's instructions</b>	You need to find out how many weeks the respondent "worked" to the extent that work is defined as any work at all even if he/she worked only one hour per week. Enter the number of weeks in the space provided at '1'. Secondly, determine the number of weeks for which the respondent did no work at all, but wanted work, and was in a position to accept work. Again, enter the number of weeks in the box labelled '2'. Finally, determine the number of weeks for which the respondent did no work at all, did not want work or was not in a position to accept work. Enter the number of weeks in box '3'. Note well that if the number of weeks for part 3 of question 12 is greater than 26, then continue at question 13, otherwise skip to question 14. Also note that all three boxes must be filled in for each respondent. Enter '00' (to indicate zero) where applicable.

### # P122: P122 - No Of Weeks Unemployed

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-] [Mean=8.012 /-] [StdDev=17.906 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be "working" by our definition.
<b>Literal question</b>	During the past 12 months, how many weeks were you (was...)?
<b>Post-question</b>	What activity the respondent was engaged in during the last 12 months. What information that would enable us to classify the working age population into three (3) groups by identifying the number of weeks spent.
<b>Interviewer's instructions</b>	You need to find out how many weeks the respondent "worked" to the extent that work is defined as any work at all even if he/she worked only one hour per week. Enter the number of weeks in the space provided at '1'. Secondly, determine the number of weeks for which the respondent did no work at all, but wanted work, and was in a position to accept work. Again, enter the number of weeks in the box labelled '2'. Finally, determine the number of weeks for which the respondent did no work at all, did not want work or was not in a position to accept work. Enter the number of weeks in box '3'. Note well that if the number of weeks for part 3 of question 12 is greater than 26, then continue at question 13, otherwise skip to question 14. Also note that all three boxes must be filled in for each respondent. Enter '00' (to indicate zero) where applicable.

### # P123: P123 - No Of Weeks Economically Inactive

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]

### # P13: P13 - Groups Not in The Labour Force

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	To which of the following groups did you (...) belong?
<b>Post-question</b>	For what reason that the respondent work, not wanting to work and not available to for the most part of the last year.
<b>Interviewer's instructions</b>	Remember that this question is only asked if the number of the number of weeks for part 3 in question 12 is greater than 26. if the response to this question is 5, remember to specify in the space provided.

Value	Label	Cases	Percentage
1	Student	124	5.9%
2	Housewife_homemaker	71	3.4%
3	Reciever Of Income From Abroad	6	0.3%
4	Retired	141	6.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P14: P14 - Economic Activity

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-2] [Missing=*/9]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you work for pay, profit or family gain, during the week ending.../.../...?
<b>Post-question</b>	The population which was active during the reference week.
<b>Interviewer's instructions</b>	Having obtained the answer which you think is appropriate in keeping with the concept of economic activity, you may now record the appropriate response. Note that if the response is 'Yes', you will skip to PART 3, which deals with persons who were employed during the reference week. If the response is 'No', then continue to question 15.

## File : LFSPQ3\_2012

### # P15: P15 - Temporary Absence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you (...) have a job or business from which you were (...was) absent during the week ending.../.../...?
<b>Post-question</b>	The reason why the respondent did no work during the reference week.
<b>Interviewer's instructions</b>	Persons without work who had made arrangements to take up paid employment or to engage in some self-employment at a period subsequent to the reference period but had not yet started work are not to be considered as temporarily absent from work. These persons are to be considered unemployed since there is no guarantee what such a job will materialise.

### # P24: P24 - Reson for Difference In Hours Worked

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	What is the reason for the difference in hours worked?
<b>Post-question</b>	Find out why the respondent worked more or less hours during the reference week than he usually does.
<b>Interviewer's instructions</b>	Note, if actual number of hours worked is equal to the usual number worked, then enter '1' in the space provided. If the actual hours worked is less than usual hours worked then a reason is required from the respondent, and options 2 to 10 should apply. Remember to specify at option '10' if it is selected. Finally, if actual hours worked is greater than usual hours worked, then respondent must give a reason. Options '11' and '12' apply in this instance. Remember to specify at option '12' if it is selected. Note that if the number of actual hours worked is equal to or greater than 35 hours, skip to question 27. The next question alerts the interviewer by asking the question 'are actual hours worked greater than or equal to 35?' and directs the respondent to question 25 if his/her response is no, and to question 27 if his/her response is yes.

### # P25: P25 - Reason For Working Less Than 35 Hours

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=846 /-] [Invalid=1245 /-]
<b>Literal question</b>	What is the MAIN reason why you (...) worked less than 35 hours during the week ending.../.../...?
<b>Post-question</b>	A person's usual work week may be less than 35 hours, and there could be a number of reasons for that.
<b>Interviewer's instructions</b>	Own illness, injury: ensure that the respondent was away from work because he was ill (as apposed to a relative or friend being ill).  12 personal, family responsibility: respondent took some time off for personal matters.  In school, training: respondent took some time off to attend a training course related to his job. Full-time work is less than 35 hours per week: choose this option if the respondent usually works less than 35 hours.  Reduction in economic activity: tick this option if there has been a low in activity relating to the respondent's job area, no work available, lack of clients, lack of orders etc.  Other reason, specify: if none of the above reasons coincide with the respondent's, then write in the reason given by the respondent in the space provided.

# P31: P31 - Gross Income			
Information	[Type= discrete] [Format=numeric] [Range= 0-9] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Literal question	What is your(...'s) gross monthly income from employment?		
Post-question	Questions on income (gross) are always very sensitive.		
Interviewer's instructions	Be mindful about the way you ask this question. The respondent need not tell you his exact income (gross). You are provided with flash cards, with different income ranges. All that is required is that the respondent indicates in which range his income falls. Do not force him to give an answer. If necessary move on to another question and come back to this one later (Appendix A shows the flash card that you will use)

# NILF1: NILF1 - Not in The Labour Force -excludes all seekers and non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	These are persons not in the labour force where labour force is defined as (LABFOR1 - In the Labour Force - includes all non-seekers), therefore this group excludes all seekers and non-seekers of work.		
Value	Label	Cases	Percentage
1	Not In Labour Force	487	<div><div></div></div> 23.3%
2	In Labour Force	1169	<div><div></div></div> 55.9%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# FIRS: FIRS - First Seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	This group are persons who are looking for work for the first time. This group includes only persons who have never worked before.		
Value	Label	Cases	Percentage
1	First Seeker	69	<div><div></div></div> 3.3%
2	Not First Seeker	1587	<div><div></div></div> 75.9%
8	Not Applicable	435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# FUT: FUT - Future Seekers			
Information	[Type= discrete] [Format=numeric] [Range= 0-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	These are persons who have never worked are seeking work currently or are persons intending to look for work in the next six months, defined using variables as (p44=2) or ( p57=1).		
Value	Label	Cases	Percentage
0	Not Applicable	0	
1	Future Seeker	142	<div><div></div></div> 6.8%
2	Not Future Seeker	1514	<div><div></div></div> 72.4%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# PERSONS: PERSONS			
Information	[Type= discrete] [Format=numeric] [Range= 1-25] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	Total number of persons in the household.		

# PERSONS: PERSONS

# PNO: Pno - Person Number
----------------------------

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	The name is recorded to distinguish persons entered on the form and enable you to identify the correct person if any information is missing.

## File : LFSPQ3\_2012M

### # PNO: Pno - Person Number

<b>Literal question</b>	What are the names of all those who slept four or more nights and shared at least one daily meal in this dwelling during the week ending.../.../...?
<b>Post-question</b>	Names, or addresses will not be put on computer records and are NEVER used in any publication result.
<b>Interviewer's instructions</b>	Write the names of ALL household occupants who are in the survey as defined in section 2.4 on page 12.

Value	Label	Cases	Percentage
1		740	35.4%
2		507	24.2%
3		360	17.2%
4		235	11.2%
5		126	6.0%
6		72	3.4%
7		34	1.6%
8		17	0.8%

### # P2: P2 - Relationship to Head Of Household

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	The first person listed is ALWAYS the head of the household. The respondent was asked to identify the head of his/her household. The head is usually the primary financial provider and may not necessarily be the respondent.
<b>Literal question</b>	What is your relation to the head of the household?
<b>Post-question</b>	The first person is listed at '01', the answer will always be 1: head. Otherwise indicate the relation to the first person of all other persons listed. Step-children, children of one partner, adopted children are all to be considered children and categorized as child, if they are so related to the head of household. Other relative" would include any other relative who does not fit options 2,3 or 4.

Value	Label	Cases	Percentage
1	Head	719	34.4%
2	Spouse	260	12.4%
3	Child	746	35.7%
4	Parent	17	0.8%
5	Other Relative	289	13.8%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P5: P5 - Migration

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 15-999] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-] [Mean=864.569 /-] [StdDev=139.676 /-]
<b>Pre-question</b>	If the respondent was born abroad in question 4, then we need to know whether he/she came to live in St. Lucia within the twelve months period preceding the reference week for the survey.
<b>Literal question</b>	How many months have you lived in St. Lucia before the week ending .../.../...?
<b>Interviewer's instructions</b>	If the reference week is July 5 - 9, 1993 and respondent answered May 1992, then you should enter 2 as the answer to the question, since it is BEFORE the twelve months period preceding the survey.

## File : LFSPQ3\_2012M

### # P6: P6 - Age Of Person

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-15] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	What was your (...s) age at last birthday?
<b>Post-question</b>	The respondent's age at his last birthday was recorded.
<b>Interviewer's instructions</b>	If the respondent is 98 years or older, then you should enter 98 in the box.. If the respondent refuses to give his age then you should enter his response as 99. NOTE THAT IF THE RESPONDENT IS UNDER 15 YEARS, you should not continue the interview.

Value	Label	Cases	Percentage
1	0-4 Years	141	6.7%
2	5-9 Years	144	6.9%

### # P121: P121 - No Of Weeks Working

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-] [Mean=22.406 /-] [StdDev=25.056 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be" working" by our definition.

## File : LFSPQ3\_2012M

### # P121: P121 - No Of Weeks Working

<b>Literal question</b>	During the past 12 months, how many weeks were you (was...)?
<b>Post-question</b>	What activity the respondent was engaged in during the last 12 months. What information that would enable us to classify the working age population into three (3) groups by identifying the number of weeks spent.
<b>Interviewer's instructions</b>	You need to find out how many weeks the respondent "worked" to the extent that work is defined as any work at all even if he/she worked only one hour per week. Enter the number of weeks in the space provided at '1'. Secondly, determine the number of weeks for which the respondent did no work at all, but wanted work, and was in a position to accept work. Again, enter the number of weeks in the box labelled '2'. Finally, determine the number of weeks for which the respondent did no work at all, did not want work or was not in a position to accept work. Enter the number of weeks in box '3'. Note well that if the number of weeks for part 3 of question 12 is greater than 26, then continue at question 13, otherwise skip to question 14. Also note that all three boxes must be filled in for each respondent. Enter '00' (to indicate zero) where applicable.

### # P122: P122 - No Of Weeks Unemployed

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-] [Mean=8.012 /-] [StdDev=17.906 /-]
<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be "working" by our definition.

### # P14: P14 - Economic Activity

Value	Label	Cases	Percentage
0		417	19.9%
1	Yes	880	42.1%
2	No	794	38.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P15: P15 - Temporary Absence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you (...) have a job or business from which you were (...was) absent during the week ending.../.../...?
<b>Post-question</b>	The reason why the respondent did no work during the reference week.
<b>Interviewer's instructions</b>	Persons without work who had made arrangements to take up paid employment or to engage in some self-employment at a period subsequent to the reference period but had not yet started work are not to be considered as temporarily absent from work. These persons are to be considered unemployed since there is no guarantee what such a job will materialise.

Value	Label	Cases	Percentage
1	Yes	18	0.9%
2	No	718	34.3%
8		1297	62.0%
9	Not Stated	58	2.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # P16: P16 - Why Absent

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=893 /-] [Invalid=1198 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Why were you (was...) absent from work during week ending.../.../...?
<b>Post-question</b>	The reasons why the respondent was temporarily absent from work during the reference week is recorded.
<b>Interviewer's instructions</b>	The reasons are listed, and remember to specify if the respondent gives a reason other than what is listed. If the answer is option 1, 2 or 3, skip to PART 3. For option 4, probe to establish if there is a formal letter from the employer. If yes, skip to PART 3. Remember to define cut-off period.

Value	Label	Cases	Percentage
1	Vacation	12	1.3%
2	Maternity Leave	3	0.3%
3	Sick Leave	1	0.1%
4	Temporary Lay-off	4	0.4%
5	Other	1	0.1%

### # P24: P24 - Reson for Difference In Hours Worked

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2091 /-] [Invalid=0 /-]
<b>Literal question</b>	What is the reason for the difference in hours worked?
<b>Post-question</b>	Find out why the respondent worked more or less hours during the reference week than he usually does.
<b>Interviewer's instructions</b>	Note, if actual number of hours worked is equal to the usual number worked, then enter '1' in the space provided. If the actual hours worked is less than usual hours worked then a reason is required from the respondent, and options 2 to 10 should apply. Remember to specify at option '10' if it is selected. Finally, if actual hours worked is greater than usual hours worked, then respondent must give a reason. Options '11' and '12' apply in this instance. Remember to specify at option '12' if it is selected. Note that if the number of actual hours worked is equal to or greater than 35 hours, skip to question 27. The next question alerts the interviewer by asking the question 'are actual hours worked greater than or equal to 35?' and directs the respondent to question 25 if his/her response is no, and to question 27 if his/her response is yes.

### # P25: P25 - Reason For Working Less Than 35 Hours

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=846 /-] [Invalid=1245 /-]
<b>Literal question</b>	What is the MAIN reason why you (...) worked less than 35 hours during the week ending.../.../...?
<b>Post-question</b>	A person's usual work week may be less than 35 hours, and there could be a number of reasons for that.
<b>Interviewer's instructions</b>	Own illness, injury: ensure that the respondent was away from work because he was ill (as apposed to a relative or friend being ill).  12 personal, family responsibility: respondent took some time off for personal matters.  In school, training: respondent took some time off to attend a training course related to his job. Full-time work is less than 35 hours per week: choose this option if the respondent usually works less than 35 hours.  Reduction in economic activity: tick this option if there has been a low in activity relating to the respondent's job area, no work available, lack of clients, lack of orders etc.  Other reason, specify: if none of the above reasons coincide with the respondent's, then write in the reason given by the respondent in the space provided.

# EMP: EMP - The Employed			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	If a person is between 15 and 98 years of age inclusive then if the person is working at a job or has more than one job (P21 = 1 or P21 = 2 or P14 = 1) or is recorded as having worked during the reference week then he/she is to be classified as being employed.		
Value	Label	Cases	Percentage
1	Employed	927	44.3%
2	Not Employed	729	34.9%
8		435	20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# UNEMP: UNEMP - The Unemployed			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	<p>The unemployed includes all persons who are seeking work (p18=2) or persons who if not seeking work are in the following categories:</p> <ol style="list-style-type: none"> <li>4. Already found work to start later</li> <li>5. Already made arrangements for self employment activities</li> <li>6. Awaiting recall to former job</li> <li>7. Awaiting replies from employers</li> <li>9. Believe no suitable work available</li> </ol>		

# UNEMP: UNEMP - The Unemployed			
	10. Believe no financial resources, land, equipment permits etc. available to start own business 11. Lack employer's requirements 12. Could not find suitable work 13. Do not know how or where to seek work  and are available for work (p20=9)		
Value	Label	Cases	Percentage
1	Unemployed	262	<div><div></div></div> 12.5%
2	Not Unemployed	1394	<div><div></div></div> 66.7%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# UNEMP1: UNEMP1 - The Unemployed - includes all non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	This definition of unemployment are made up of all seekers (p18) and non-seekers of work (p19).		
Value	Label	Cases	Percentage
1	Unemployed	242	<div><div></div></div> 11.6%
2	Not Unemployed	1414	<div><div></div></div> 67.6%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# LABFOR: LABFOR - In the Labour Force			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	The labour force is defined here as the employed (based on EMP variable previously defined) and the unemployed (UNEMP previously defined).		
Value	Label	Cases	Percentage
1	In Labour Force	1189	<div><div></div></div> 56.9%
2	Not In Labour Force	467	<div><div></div></div> 22.3%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# LABFOR1: LABFOR1 - In the Labour Force - includes all non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	The labour force is defined here as the employed (based on EMP variable previously defined) and the unemployed (UNEMP1 previously defined).		
Value	Label	Cases	Percentage
1	In Labour Force	1169	<div><div></div></div> 55.9%
2	Not In Labour Force	487	<div><div></div></div> 23.3%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# NILF: NILF - Not in The Labour Force			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	This variable includes persons 15 years and over who are not in the labour force based on their current activity status assessed during the reference week for the survey. This group includes mostly (P20) persons:		

# NILF: NILF - Not in The Labour Force			
	1. In school, training * 2. Retirement/old age * 3. Illness/disability * 4. Household/family duties *		
Value	Label	Cases	Percentage
1	Not In Labour Force	467	<div><div></div></div> 22.3%
2	In Labour Force	1189	<div><div></div></div> 56.9%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# NILF1: NILF1 - Not in The Labour Force -excludes all seekers and non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	These are persons not in the labour force where labour force is defined as (LABFOR1 - In the Labour Force - includes all non-seekers), therefore this group excludes all seekers and non-seekers of work.		
Value	Label	Cases	Percentage
1	Not In Labour Force	487	<div><div></div></div> 23.3%
2	In Labour Force	1169	<div><div></div></div> 55.9%
8		435	<div><div></div></div> 20.8%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# FIRS: FIRS - First Seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2091 /-] [Invalid=0 /-]		
Recoding and Derivation	This group are persons who are looking for work for the first time. This group includes only persons who have never worked before.		
Value	Label	Cases	Percentage
1	First Seeker	69	<div><div></div></div> 3.3%
2	Not First Seeker	1587	<div><div></div></div> 75.9%
8	Not Applicable	435	<div><div></div></div> 20.8%

# PNO: Pno - Person Number

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-]
<b>Pre-question</b>	The name is recorded to distinguish persons entered on the form and enable you to identify the correct person if any information is missing.
<b>Literal question</b>	What are the names of all those who slept four or more nights and shared at least one daily meal in this dwelling during the week ending.../.../...?
<b>Post-question</b>	Names, or addresses will not be put on computer records and are NEVER used in any publication result.
<b>Interviewer's instructions</b>	Write the names of ALL household occupants who are in the survey as defined in section 2.4 on page 12.

Value	Label	Cases	Percentage
1		830	<div></div> 33.9%
2		599	<div></div> 24.5%
3		417	<div></div> 17.0%

# P2: P2 - Relationship to Head Of Household

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-]
<b>Pre-question</b>	The first person listed is ALWAYS the head of the household. The respondent was asked to identify the head of his/her household. The head is usually the primary financial provider and may not necessarily be the respondent.
<b>Literal question</b>	What is your relation to the head of the household?
<b>Post-question</b>	The first person is listed at '01', the answer will always be 1: head. Otherwise indicate the relation to the first person of all other persons listed. Step-children, children of one partner, adopted children are all to be considered children and categorized as child, if they are so related to the head of household. Other relative" would include any other relative who does not fit options 2,3 or 4.

Value	Label	Cases	Percentage
1	Head	798	<div><div></div></div> 32.6%
2	Spouse	318	<div><div></div></div> 13.0%

### # P4: P4 - Place Of Birth

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P5: P5 - Migration

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 15-999] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-] [Mean=875.139 /-] [StdDev=107.252 /-]
<b>Pre-question</b>	If the respondent was born abroad in question 4, then we need to know whether he/she came to live in St. Lucia within the twelve months period preceding the reference week for the survey.
<b>Literal question</b>	How many months have you lived in St. Lucia before the week ending .../.../...?
<b>Interviewer's instructions</b>	If the reference week is July 5 - 9, 1993 and respondent answered May 1992, then you should enter 2 as the answer to the question, since it is BEFORE the twelve months period preceding the survey.

### # P6: P6 - Age Of Person

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-15] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-]
<b>Literal question</b>	What was your (...)'s age at last birthday?
<b>Post-question</b>	The respondent's age at his last birthday was recorded.
<b>Interviewer's instructions</b>	If the respondent is 98 years or older, then you should enter 98 in the box.. If the respondent refuses to give his age then you should enter his response as 99. NOTE THAT IF THE RESPONDENT IS UNDER 15 YEARS, you should not continue the interview.

### # P121: P121 - No Of Weeks Working

Information	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-] [Mean=21.679 /-] [StdDev=24.942 /-]

## File : LFSPQ4\_2012

### # P121: P121 - No Of Weeks Working

<b>Pre-question</b>	What we mean by working is that the respondent was engaged in some form of economic activity. Thus women who work in the home at household chores are not to be considered to be "working" by our definition.
<b>Literal question</b>	During the past 12 months, how many weeks were you (was...)?
<b>Post-question</b>	What activity the respondent was engaged in during the last 12 months. What information that would enable us to classify the working age population into three (3) groups by identifying the number of weeks spent.
<b>Interviewer's instructions</b>	You need to find out how many weeks the respondent "worked" to the extent that work is defined as any work at all even if he/she worked only one hour per week. Enter the number of weeks in the space provided at '1'. Secondly, determine the number of weeks for which the respondent did no work at all, but wanted work, and was in a position to accept work. Again, enter the number of weeks in the box labelled '2'. Finally, determine the number of weeks for which the respondent did no work at all, did not want work or was not in a position to accept work. Enter the number of weeks in box '3'. Note well that if the number of weeks for part 3 of question 12 is greater than 26, then continue at question 13, otherwise skip to question 14. Also note that all three boxes must be filled in for each respondent. Enter '00' (to indicate zero) where applicable.

### # P122: P122 - No Of Weeks Unemployed

<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-52] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-] [Mean=7.444 /-] [StdDev=17.272 /-]

### # P14: P14 - Economic Activity

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-2] [Missing=*/9]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-]

## File : LFSPQ4\_2012

### # P14: P14 - Economic Activity

<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you work for pay, profit or family gain, during the week ending.../.../...?
<b>Post-question</b>	The population which was active during the reference week.
<b>Interviewer's instructions</b>	Having obtained the answer which you think is appropriate in keeping with the concept of economic activity, you may now record the appropriate response. Note that if the response is 'Yes', you will skip to PART 3, which deals with persons who were employed during the reference week. If the response is 'No', then continue to question 15.

Value	Label	Cases	Percentage
0		542	22.2%
1	Yes	1043	42.6%
2	No	861	35.2%

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # P15: P15 - Temporary Absence

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*/0]
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-]
<b>Pre-question</b>	Only one person who were engaged in an economic activity or who were seeking and available for such activity are to be considered for inclusion in the labour force.
<b>Literal question</b>	Did you (...) have a job or business from which you were (...was) absent during the week ending.../.../...?
<b>Post-question</b>	The reason why the respondent did no work during the reference week.
<b>Interviewer's instructions</b>	Persons without work who had made arrangements to take up paid employment or to engage in some self-employment at a period subsequent to the reference period but had not yet started work are not to be considered as temporarily absent from work. These persons are to be considered unemployed since there is no guarantee what such a job will materialise.

## # P24: P24 - Reson for Difference In Hours Worked

Information	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Literal question	What is the reason for the difference in hours worked?		
Post-question	Find out why the respondent worked more or less hours during the reference week than he usually does.		
Interviewer's instructions	Note, if actual number of hours worked is equal to the usual number worked, then enter '1' in the space provided. If the actual hours worked is less than usual hours worked then a reason is required from the respondent, and options 2 to 10 should apply. Remember to specify at option '10' if it is selected. Finally, if actual hours worked is greater than usual hours worked, then respondent must give a reason. Options '11' and '12' apply in this instance. Remember to specify at option '12' if it is selected. Note that if the number of actual hours worked is equal to or greater than 35 hours, skip to question 27. The next question alerts the interviewer by asking the question 'are actual hours worked greater than or equal to 35?' and directs the respondent to question 25 if his/her response is no, and to question 27 if his/her response is yes.		
Value	Label	Cases	Percentage

<b># P31: P31 - Gross Income</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9] [Missing=*]		
<b>Statistics [NW/ W]</b>	[Valid=2446 /-] [Invalid=0 /-]		
<b>Literal question</b>	What is your(...)'s gross monthly income from employment?		
<b>Post-question</b>	Questions on income (gross) are always very sensitive.		
<b>Interviewer's instructions</b>	Be mindful about the way you ask this question. The respondent need not tell you his exact income (gross). You are provided with flash cards, with different income ranges. All that is required is that the respondent indicates in which range his income falls. Do not force him to give an answer. If necessary move on to another question and come back to this one later (Appendix A shows the flash card that you will use)

# EMP: EMP - The Employed			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	If a person is between 15 and 98 years of age inclusive then if the person is working at a job or has more than one job (P21 = 1 or P21 = 2 or P14 = 1) or is recorded as having worked during the reference week then he/she is to be classified as being employed.		
Value	Label	Cases	Percentage
1	Employed	1078	44.1%
2	Not Employed	799	32.7%
8		569	23.3%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# UNEMP: UNEMP - The Unemployed			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	<p>The unemployed includes all persons who are seeking work (p18=2) or persons who if not seeking work are in the following categories:</p> <ol style="list-style-type: none"> <li>4. Already found work to start later</li> <li>5. Already made arrangements for self employment activities</li> <li>6. Awaiting recall to former job</li> <li>7. Awaiting replies from employers</li> <li>9. Believe no suitable work available</li> </ol>		

# UNEMP: UNEMP - The Unemployed			
	10. Believe no financial resources, land, equipment permits etc. available to start own business 11. Lack employer's requirements 12. Could not find suitable work 13. Do not know how or where to seek work  and are available for work (p20=9)		
Value	Label	Cases	Percentage
1	Unemployed	271	<div></div> 11.1%
2	Not Unemployed	1606	<div></div> 65.7%
8		569	<div></div> 23.3%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# UNEMP1: UNEMP1 - The Unemployed - includes all non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	This definition of unemployment are made up of all seekers (p18) and non-seekers of work (p19).		
Value	Label	Cases	Percentage
1	Unemployed	240	<div></div> 9.8%
2	Not Unemployed	1637	<div></div> 66.9%
8		569	<div></div> 23.3%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# LABFOR: LABFOR - In the Labour Force			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	The labour force is defined here as the employed (based on EMP variable previously defined) and the unemployed (UNEMP previously defined).		
Value	Label	Cases	Percentage
1	In Labour Force	1349	<div></div> 55.2%
2	Not In Labour Force	528	<div></div> 21.6%
8		569	<div></div> 23.3%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# LABFOR1: LABFOR1 - In the Labour Force - includes all non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	The labour force is defined here as the employed (based on EMP variable previously defined) and the unemployed (UNEMP1 previously defined).		
Value	Label	Cases	Percentage
1	In Labour Force	1318	<div></div> 53.9%
2	Not In Labour Force	559	<div></div> 22.9%
8		569	<div></div> 23.3%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# NILF: NILF - Not in The Labour Force			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	This variable includes persons 15 years and over who are not in the labour force based on their current activity status assessed during the reference week for the survey. This group includes mostly (P20) persons:		

# NILF: NILF - Not in The Labour Force			
	1. In school, training * 2. Retirement/old age * 3. Illness/disability * 4. Household/family duties *		
Value	Label	Cases	Percentage
1	Not In Labour Force	528	<div><div></div></div> 21.6%
2	In Labour Force	1349	<div><div></div></div> 55.2%
8		569	<div><div></div></div> 23.3%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# NILF1: NILF1 - Not in The Labour Force -excludes all seekers and non-seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	These are persons not in the labour force where labour force is defined as (LABFOR1 - In the Labour Force - includes all non-seekers), therefore this group excludes all seekers and non-seekers of work.		
Value	Label	Cases	Percentage
1	Not In Labour Force	559	<div><div></div></div> 22.9%
2	In Labour Force	1318	<div><div></div></div> 53.9%
8		569	<div><div></div></div> 23.3%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# FIRS: FIRS - First Seekers			
Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]		
Statistics [NW/ W]	[Valid=2446 /-] [Invalid=0 /-]		
Recoding and Derivation	This group are persons who are looking for work for the first time. This group includes only persons who have never worked before.		
Value	Label	Cases	Percentage
1	First Seeker	80	<div><div></div></div> 3.3%
2	Not First Seeker	1797	<div><div></div></div> 73.5%
